

## Latest NewControl Events

### TRA Lisbon 2022

This year the Transport Research Arena (TRA), the largest European research and technology conference on transport and mobility, was organized in Lisbon, Portugal. On the 14th of November, NewControl coordinator Darjan Kozic from AVL participated in Subtheme's 1.1 "User-Focus And Inclusive Mobility" Scientific & Technical session and presented the first results of NewControl implemented research about User Acceptance and Trust in Automated Vehicles.

### EF ECS 2022

In 2022, after a two-year break, we again had the opportunity to participate in a live EF ECS exhibition and present the project to the ambitious EC's projects community in Amsterdam. At the conference we had a special NewControl booth with posters, videos and even three physical demonstrators contributing to the Autonomous driving development: Lifetime monitoring platform (AVL), MEMS North Finding device (Murata) and Vision-based driver monitoring simulator (Tampere University).

## Upcoming events

- 16-18.01.2023** HiPEAC 2023, France
- 19.01.2023** Innovation Fund: Financing Innovative Clean Tech Conference, online
- 7-8.02.2023** ECS Brokerage event, Belgium
- 15.02.2023** NewControl Demonstrators for Autonomous Driving, Finland
- 16.03.2023** NewControl Demonstrators for Autonomous Driving, Italy
- 8-9.03.2023** Big data & AI World, UK
- 17-19.04.2023** Design, Automation and Test in Europe Conference, Belgium

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 826653-2
