

## Latest NewControl Events

### The 3<sup>rd</sup> NewControl Review meeting

On the 13<sup>th</sup>-14<sup>th</sup> of September 2022, NewControl partners met in the 3<sup>rd</sup> Review Meeting in Brussels. Two days event was dedicated to presenting the third year's progress in the project's eight Work Packages and eight Supply Chains. Also, at the end of the first day, a special technical session with demonstrators' posters and several physical demonstrators was organized.

At the end of the second day, the NewControl team heard an excellent the project's achievement assessment. Great progress has been made in the third year and the project is moving toward its goals. NewControl will end in March 2023, so the final results of the project will be presented very soon!

### The Autonomous Main Event

On the 27<sup>th</sup> of September 2022, the Autonomous Main event gathered in Vienna and virtually more than 500 industry leaders and experts from over 200 global companies to discuss the importance and urgency of collaboration to achieve safe autonomous mobility.

This year, the NewControl project again was a part of this impressive event and the Spotlight Session "Research & Innovation in Autonomous and Connected Mobility," co-hosted by TTTech. Autonomous, connected and electric mobility are recognized as the most disruptive trends in the automotive industry. The automated driving features currently available are only a fraction of what is being developed for the future.
